Art Unit: 1712

1. Claims 25 to 29 and 32 to 45 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. In claim 24, the subscript "m" is from 2 to 12, indicating that the macromonomer can have no more than 12 E groups. In claim, "n" is defined as at least 1, and is thus inclusive of monomers having more than 12 E groups.
2. Claims 24 to 45 are objected to because of the following informalities: It appears that the group BO_2H is chemically incorrect. In this formula, B would appear to have a valency of 4, while B has a valency of 3. Based on the reactants disclosed in the specification it appears that this should be a BO_2H_2 group. Appropriate correction is required.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
4. Claims 24, 30 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Engelbrecht et al.

Engelbrecht et al. teach polymerizable compounds containing acid and acid derivatives. See for instance column 2, line 45, through the top of column 3. Engelbrecht et al. teach that the compounds therein have three or more polymerizable groups and three or more acid radicals or their salts. The specifically delineated value of three anticipates the values of n' and m as claimed. See also the specific formulas shown on columns 3 and 4. This anticipates the instant claims.
5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent

and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 24 to 45 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 to 20 of U.S. Patent No. 6,369,164. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed macromonomer is embraced by the macromonomer found in the dental composition of '164. Since macromonomers within the breadth of instant claim 24 must be present in the claimed composition of '164, the claims are not patentably distinct. Note for instance that the claimed monomer can contain the same components additionally found in the claims of '164. See for instance instant claim 34.
